M320 BlueFire® 40mm Grenade Launcher Module Simulator

Train with the M320 without consuming unit ammo allocation, range resources, risk to individual safety, and buy back your most precious resource, TIME!

Now you can train realistically on the M320 with an established, advanced simulation system. The BlueFire© M320 simulator is built from a non-gun M320 and is true to form, fit and function of the live weapon system. The M320 can be underslung by removing the stock and fitting the simulator to a host M4 rifle or similar platform or shot in standalone configuration. The trusted fats© systems, software, simulation and secure environment provide realistic training content appropriate for new shooters and accomplished marksmen.

Ammunition: all low-velocity 40mm grenade types are available:

- M406 High Explosive
- M433 HEDP
- M992 IR Illum
- M785 Training Round
- M1006 Non-Lethal
- M1029 Crowd Dispersal
- Red, Green, Yellow Smoke
- White, Green, Red star cluster / parachute

Compatible with all InVeris 100X screen-based simulation systems

- fats© 100MIL
- ISMT (USMC)
- EST-II (Army)
- AFRQ (USAF)

The M320 fully replicates the capabilities of the M320.

- Rate of fire: 5-7 RPM
- Effective Range: 150m point -350m area
- Max Effective Range: 400m
- Feed system: Single shot / Breech loaded
- Simulation of dud rounds and clearance drills
