

# fats PRT PRECISION RIFLE TRAINER

The PRT is a VR precision rifle trainer used to teach the use of complex reticles. Capabilities include ballistic solver to customize rifle and ballistic data.

## VRS Overview

- Ballistics Solver
- Any Horus Reticle (H59, TREMOR3, TREMOR8, etc.)
- Ability to manipulate atmospheric and wind
- Over 20 training modules
  - Elevation Holds
  - Windage
  - Leads on moving targets
  - Range Estimation
  - Hostage rescue
  - Shoot/don't shoot scenarios
  - Overwatch/combat support
- Includes day and night vision mode in all modes and scenarios
- Build your own range with static and moving targets
- Work wind cosine equations with varying winds
- Shoot realistic humanoid targets and vehicle movers at various speeds
- Known and unknown range settings (Range, DOPE, ToF)
- Portable pelican case / 10min setup/ 8'x8' footprint
- stronger knowledge retention, so that officers can respond

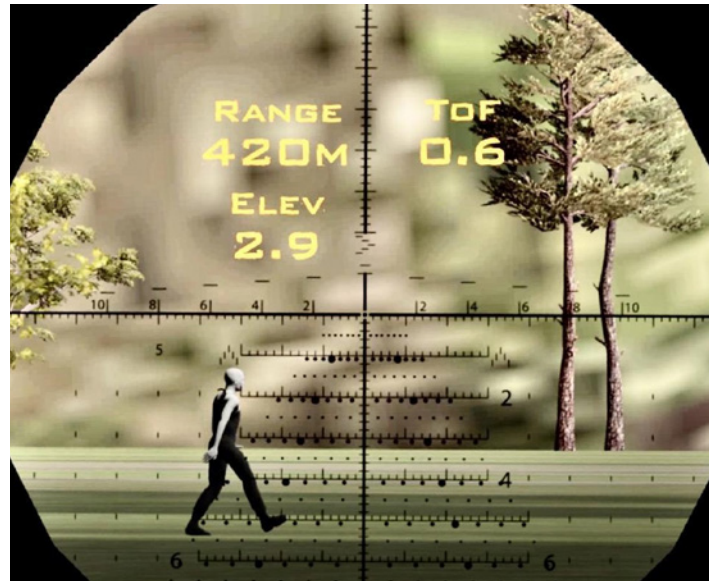

## VRS BENEFITS

- Increase Sniper / Spotter competency by dry fire repetition
- Decrease time to determine wind call/ leads on movers
- Maximizes the training value of the live fire ranges
- Cost effective sustainment between live fire evolutions
- Sustain shooter proficiency when unable to be on the gun
- No Range Restrictions (Close Proximity, Human Movers)
- Custom programing available for purchase

## VRS Setup

- Gaming Laptop
- HTC Vive Pro 2
- Remote
- Tracker
- 2 lighthouses
- Includes a mock chassis and
- A receiver to fit any Remington 700 action
- Options:
  - M110 or M110A1 surrogate
  - Tracker and external trigger sensor kit.
- This allows a user to use their own duty rifle in simulation.

## VRS STORAGE

Case Size- 35'x19'x15
